# About Us

Shreya Electricals was founded in Pune, India in 2005 and is one of the reputed manufacturers and exporters of quality range of electric and automatic control panels. We manufacture and supply technologically advanced products, which are widely acclaimed in almost all manufacturing, process and telecom industries. With our excellent designing and engineering capabilities, we are able to offer a wide variety of electrical control panels & electrical distribution boards including MCC, PCC, and AMF, APFC, PLC and Synchronizing panels.

## Vision

To be the most preferred power control solution provider through a professionally managed, dynamic, value based organization with exceptionally skilled, high qualified & motivated team which is committed to total customer satisfaction and delight with high quality standards.

## Mission

Total quality assurance with continuous improvement to extend our commitments beyond delivery of the product and provide transparent and cost effective after sales services to the total delight of our customers.

Our Values  Safety  Quality  Integrity  Teamwork  Continuous Improvement

## Key Differentiators

### Quality is a Standard

Our goal is simply to be the best and to continually improve. To monitor the quality of our products we have our own quality control department. The department is fully equipped to conduct various tests to ensure that the quality of products is consistent. Rigorous quality checks and tests are done at various stages of manufacturing. On the completely assembled panel, routine tests as per IS:8623 are conducted. All raw materials are procured from reputed manufacturers and we have a stringent supply chain with periodic quality audits. The high quality of inputs ensures that the final product is of premium. Our team members are quality focused.

### Infrastructure

Our state-of-the-art manufacturing facility is equipped with all the necessary hi-tech equipment and machinery required for production of comprehensive gamut of control & power panels. The facility is spread over a sizeable area and has an install base of high end machinery and sophisticated shop floor which helps us in maintaining the high level of quality in production.

### Safety is our Culture

Keeping our employees and our client project safe are the most important matter to us, and safety will always come first as we strive for accident-free projects. We are committed to safety.

### Committed to Clients

We feel a sense of urgency on any matters related to our clients. We own problems and we are always responsive. We are client driven.

### Innovative Solutions

Our team members are focused, developed, and proficient on the most advanced technologies, methods, and processes in the industrial engineering, construction, & maintenance sector. We are experts in our field.

## Services

Whether you need a regular service agreement or occasional emergency help desk support, we at Shreya Electricals can tailor a service and support solution to suit your requirements. These services are appreciated for reliability, cost effectiveness and timely execution. Our team of professionals are highly experienced and possess in-depth knowledge of the machines being handled. Widely appreciated by our customers, these services are provided in strict compliance with current codes and standards of quality and excellence. Drawing on our extensive experience, we deliver practical, economical and high quality service offerings and value added customizable maintenance service programs.

With proper and professional maintenance of equipment and facilities we provide systematic inspection, detection, and correction of incipient failures either before they occur or before they develop into major defects. Preventative maintenance includes tests, measurements, adjustments, and parts replacement, performed specifically to prevent faults from occurring and to sustain adequate operating condition of equipment and facilities. Our customizable maintenance programs are designed to preserve and restore equipment reliability. Preventive maintenance activities include partial or complete repairs which are performed and scheduled on regular basis.

Our services include -

### Repair and Maintenance Service

This service is vastly applauded by our patrons in various industry verticals and segments. Our customers can avail this Service at market competitive rates with us. It is rendered by our professional engineers and technicians who has rich industry experience in this domain. Industrial Electrical Machines.

- Power Panels
- Control Panels
- E.O.T. Cranes
- Electrical Systems
- DG Maintenance
- HVAC Systems

### Preventative and Predictive Maintenance Programs

Our programs are the key to handling electrical problems before they become expensive. Predictive Maintenance provides the ability to identify problems before they happen and coordinate an orderly repair. Our Preventative and Predictive Maintenance programs can be customized and performed at convenient hours and during a slower business schedule.
